Executive Summary

Passionate and results-driven Computer Science and Engineering student seeking a **Java Full Stack Developer** role. Skilled in **HTML, CSS, JavaScript, Java,PHP,Bootstrap, MySQL, and PostgreSQL,JDBC,Servlet, Hibernate** with hands-on experience developing responsive web applications. **Strong problem-solving, debugging, and database management skills** complemented by effective **communication**, teamwork, and adaptability. Eager to contribute, **learn, and grow in a dynamic software development** environment.

Projects

Restaurant Management Website github.com/irfanaelahi/restaurant-management

- Developed a dynamic restaurant website with food displays, About, Services, Contact, and user registration features using PHP, HTML, and CSS
- Implemented PHP–MySQL database connectivity and form handling using XAMPP, enabling efficient storage and retrieval of user information
- Designed a user-friendly interface with custom CSS and structured navigation, improving accessibility and overall user experience
- Tools Used: PHP, MySQL, HTML5, CSS3, XAMPP, GitHub

Advanced To-Do

- Built a client-side task manager with full CRUD functionality, using the localStorage API for persistent data storage without a backend
- Implemented real-time search filtering and a live task-completion counter that updates dynamically with every state change
- Designed a dark/light theme toggle and category-based task organization, improving usability and accessibility across the app
- Tools Used: JavaScript, HTML5, CSS3, Bootstrap, Web Storage API

Responsive Landing page with interactive UI

- Built a fully responsive landing page using HTML5 and CSS3, featuring custom animations, hover effects, and floating-label inputs
- Implemented CSS keyframe animations and transitions to create glowing buttons, image sliders, and smooth-scroll navigation for an engaging UI
- Tools Used: HTML5,CSS3,VSCode

Fashion Frenzy- Interactive Event Webpage

- Built an interactive event webpage with a JavaScript-powered auto-scroll feature, image gallery, and category-based navigation using semantic HTML
- Tools Used: HTML5,JavaScript

Skill

Programming Languages: Java, Python,PHP

Database: PostgreSQL,MySQL

Web Technologies:HTML5,CSS3,JavaScript,Bootstrap
,JDBC,Servlet ,Hibernate

Framework: Spring boot

Tools Platform:VSCode,Eclipse.

Language known :English,Urudu,Tamil,Hindi
